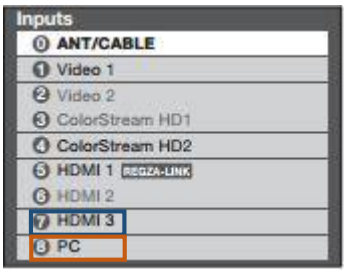
Fiedler Hall Study Room 1087

Instructions for the use of the wall mounted television

To use the presentation computer

- Press the television power button located on the lower right panel of the television.
- Log into the desktop computer using your eid and engineering password.
- If the desktop computer is not displayed on the television set:
  - Press the input button located on the lower right panel of the television.
  - The **Input List Display** will appear and set it to **HDMI 3**.
- **Note:** Please turn off the television when not in use by pressing the power button located on the lower right panel of the television.



Input List Display for Television

To use a laptop

- Plug the provided **VGA cable** into your laptop and properly secure.
- It may be necessary to tell your Windows laptop to direct signal to the television. Locate the "⊞" key on your laptop, hold it down and press the "**P**" key simultaneously. **Windows system display mode** will appear, and you will want to select "Duplicate".
- If you are using a Mac laptop you will need to connect the provided **VGA cable**, click the upper left-hand Apple menu, select System Preferences, then Displays, and finally select "Detect Displays". Please locate your computer manual for the keyboard shortcut.
- The television will notify you that a "New external input is connected".
  - Select "Yes" through the television by pressing the enter button located on the lower left corner of the television.
  - If not prompted, press the input button and select **PC**.
- **Note:** Please turn off the television when not in use by pressing the power button located on the lower left corner of the television.
